57   2102900100179  an API.	1		
	5.7	2102000100150	

		E-commerce App An e-commerce app is a more complex project that allows users to browse products, add them to a shopping cart, and complete the checkout process. You can create a mock API to fetch product data or use an e-commerce API like Commerce.js to get real product data.
58	2102900100180	When building an e-commerce app, you'll: - Practice managing state in a React app, as you'll need to keep track of the shopping cart contents and user information Learn how to implement user authentication and handle secure payments.
		Quiz App A quiz app allows users to take multiple-choice quizzes on various topics. You can create your own quizzes or use an API like Open Trivia API to fetch quiz questions. Your app should display the quiz questions one at a time, with the user selecting an answer before moving on to the next question. At the end of the quiz, the user should see their score and have the option to retake the quiz.
59	2102900100181	By building a quiz app, you'll: - Practice managing state in a React app, as you'll need to keep track of the user's answers and score Learn how to create interactive components, like buttons and timers.
