S.No.	Roll No	Project Name
		Project Name
1	2102900100060	Portfolio Website : Create a personal portfolio website to showcase your projects and skills.
2	2102900100061	Weather Forecast App : Build an app that not only displays current weather but also forecasts.
3	2102900100062	Currency Converter : Build an app that converts currencies using real-time exchange rates.
4	2102900100063	Recipe Search App A recipe search app allows users to search for recipes based on ingredients, dish name, or cuisine. You can use a recipe API, such as Spoonacular, to fetch the recipe data. Your app should display a list of recipes with images, titles, and short descriptions, and allow users to click on a recipe to view more details like ingredients and instructions. This project will help you: - Learn how to implement search functionality in a React app. - Practice fetching and displaying data from an API.
5	2102900100064	E-commerce App An e-commerce app is a more complex project that allows users to browse products, add them to a shopping cart, and complete the checkout process. You can create a mock API to fetch product data or use an e-commerce API like Commerce.js to get real product data. When building an e-commerce app, you'll: - Practice managing state in a React app, as you'll need to keep track of the shopping cart contents and user information. - Learn how to implement user authentication and handle secure payments.
6	2102900100065	Quiz App A quiz app allows users to take multiple-choice quizzes on various topics. You can create your own quizzes or use an API like Open Trivia API to fetch quiz questions. Your app should display the quiz questions one at a time, with the user selecting an answer before moving on to the next question. At the end of the quiz, the user should see their score and have the option to retake the quiz. By building a quiz app, you'll: - Practice managing state in a React app, as you'll need to keep track of the user's answers and score. - Learn how to create interactive components, like buttons and timers.
7	2102900100066	React-Game-Khajana 1. Roll your Dice 2. OTP Generator 3. Password Generator 4. rock paper scissors 5. Today's Menu 6. My Lucky day 7. Match Making 8. Know your Gender
8	2102900100067	Current Affairs Of India - Create a react app using api
9	2102900100068	Conferences Web Site
10	2102900100069	Task Tracker app
11	2102900100070	Portfolio Website : Create a personal portfolio website to showcase your projects and skills.
12	2102900100071	Weather Forecast App : Build an app that not only displays current weather but also forecasts.
13	2102900100072	Currency Converter : Build an app that converts currencies using real-time exchange rates.
14	2102900100073	Recipe Search App A recipe search app allows users to search for recipes based on ingredients, dish name, or cuisine. You can use a recipe API, such as Spoonacular, to fetch the recipe data. Your app should display a list of recipes with images, titles, and short descriptions, and allow users to click on a recipe to view more details like ingredients and instructions. This project will help you: - Learn how to implement search functionality in a React app. - Practice fetching and displaying data from an API.
15	2102900100074	E-commerce App An e-commerce app is a more complex project that allows users to browse products, add them to a shopping cart, and complete the checkout process. You can create a mock API to fetch product data or use an e-commerce API like Commerce.js to get real product data. When building an e-commerce app, you'll: - Practice managing state in a React app, as you'll need to keep track of the shopping cart contents and user information. - Learn how to implement user authentication and handle secure payments.

16	2102900100075	Quiz App A quiz app allows users to take multiple-choice quizzes on various topics. You can create your own quizzes or use an API like Open Trivia API to fetch quiz questions. Your app should display the quiz questions one at a time, with the user selecting an answer before moving on to the next question. At the end of the quiz, the user should see their score and have the option to retake the quiz. By building a quiz app, you'll: - Practice managing state in a React app, as you'll need to keep track of the user's answers and score. - Learn how to create interactive components, like buttons and timers.
17	2102900100076	React-Game-Khajana 1. Roll your Dice 2. OTP Generator 3. Password Generator 4. rock paper scissors 5. Today's Menu 6. My Lucky day 7. Match Making 8. Know your Gender
18	2102900100077	Current Affairs Of India - Create a react app using api
19	2102900100078	Conferences Web Site
20	2102900100079	Task Tracker app
21	2102900100080	Portfolio Website : Create a personal portfolio website to showcase your projects and skills.
22	2102900100081	Weather Forecast App : Build an app that not only displays current weather but also forecasts.
23	2102900100082	Currency Converter : Build an app that converts currencies using real-time exchange rates.
24	2102900100084	Recipe Search App A recipe search app allows users to search for recipes based on ingredients, dish name, or cuisine. You can use a recipe API, such as Spoonacular, to fetch the recipe data. Your app should display a list of recipes with images, titles, and short descriptions, and allow users to click on a recipe to view more details like ingredients and instructions. This project will help you: - Learn how to implement search functionality in a React app. - Practice fetching and displaying data from an API.
25	2102900100085	E-commerce App An e-commerce app is a more complex project that allows users to browse products, add them to a shopping cart, and complete the checkout process. You can create a mock API to fetch product data or use an e-commerce API like Commerce.js to get real product data. When building an e-commerce app, you'll: - Practice managing state in a React app, as you'll need to keep track of the shopping cart contents and user information. - Learn how to implement user authentication and handle secure payments.
26	2102900100086	Quiz App A quiz app allows users to take multiple-choice quizzes on various topics. You can create your own quizzes or use an API like Open Trivia API to fetch quiz questions. Your app should display the quiz questions one at a time, with the user selecting an answer before moving on to the next question. At the end of the quiz, the user should see their score and have the option to retake the quiz. By building a quiz app, you'll: - Practice managing state in a React app, as you'll need to keep track of the user's answers and score. - Learn how to create interactive components, like buttons and timers.
